## SL Advisors SMA Fact Sheet

### Objective

SL Advisors SMA strategy is focused on North American energy infrastructure. Investors receive K-1s as direct MLP investments comprise roughly half the portfolio.

### Investment Strategy

#### MLP & Energy Infrastructure SMA:

- Aims to outperform the Alerian MLP Index with similar volatility and low turnover
- Unleveraged, long only portfolio of Master Limited Partnerships (MLPs) and corporations focused on the Midstream sector (Pipelines)
- Avoids MLPs with burdensome Incentive Distribution Rights (IDRs)
- Appropriate for high net worth investors desiring exposure to North American Energy Infrastructure and comfortable receiving K-1s for individual investments.

## Key Reasons To Invest

### Income:

The portfolio has a TTM dividend yield of 5.8% with dividend **coverage of 2.5X** allowing companies to pay a reliable dividend while self-financing growth and bringing down leverage.

**Tax Efficiency:** The strategy seeks tax efficiency through a low turnover strategy of direct holdings.

**Strong Corporate Governance:** Does NOT invest in MLPs that have Incentive Distribution Rights (IDR) obligations. Owns corporations that have superior corporate governance to that of many MLPs.

**Performance:** Long-term track record of strong returns.

Returns do not include cash balances prior to May 2010. The Index is the Alerian MLP Index, AMZX. Past performance is not indicative of future returns.

Disclosure: Returns for the MLP and Energy Infrastructure SMAs reflect the performance of the composite of all discretionary accounts invested in this strategy. The returns shown reflect the deduction of an annual advisory fee, as well as other charges incurred by the accounts, including brokerage and custodian fees. The returns shown also include reinvestment of dividends and other earnings. The performance of the Alerian MLP index is shown for comparison purposes only. The Alerian MLP is a float-adjusted, capitalization-weighted index, which tracks 40 large- and mid-cap energy Master Limited Partnerships (MLPs), capturing 75% of available market capitalization. This index tracks securities which most closely correlate to the securities in which the SMAs invest. You cannot invest directly in an index. Past performance is no guarantee of future results.
